Students have to complete the enrolment form as complete as possible to make our Teaching division able to design the most specific syllabus.

Progress and Final tests are conducted to assess the students' learning progress. A student report is given to a student after completing the training. A student can obtain a learning certificate after completing a minimum of 30 sessions.

The Teaching and Learning Methodology

We believe in communicative language teaching. Therefore, class activities are based on the communicative approach to enable learners to communicate in, rather than analyze, the target language. English is usually only used as a last resort. We use an eclectic range of techniques to make learners feel at ease and well-motivated when learning the target language.

Methods such as Silent Way and Total Physical Response are used to supplement the direct approach in those situations where they can be more helpful in mastering language skills.

We are not so many teachers as friends. We do not teach the language but instead create situations where learners enjoy communicating in the target language. Hospitality is our principle. We do not name our institution a college or school but a home of language, "Wisma Bahasa".

The Teachers

Our teachers are composed of graduates of some universities and institutions in Indonesia. We possess different educational backgrounds: language and language teaching (English, Indonesian, Javanese, Japanese, French, Germany), Indonesian and English literature, Anthropology, Archaeology, History, Politics, and Economics.

We also present a cross-section of cultural backgrounds (Javanese, Sundanese, Madurese, Timorese). We guarantee that our teachers are experienced, competent, working full time in Wisma Bahasa, proficient in foreign languages (English is mandatory), and received rigorous pre-service training. Wisma Bahasa also holds regular weekly training sessions and workshops to keep up with the latest issues.
